I am a young graduate who is looking for his first experience in a workplace. I am currently doing a bootcamp in front-end development which is expanding my technical skills as well as my other hard skills too.

I am willing to learn, I can work well independently, I am hard-working, passionate, a fast learner, a team-worker, and committed. All these qualities, I know will help me succeed in my profession. Given the opportunity I will give more than my 100%.

Technical Skills

HTML5, CSS3, Bootstrap, JavaScript, JQuery, Node.js, React

Education

Front-End Web Development Bootcamp Certificate: edX

2023-2024 (16 weeks)

Bexhill College - Bexhill

- Awarded Triple Distinction Star

10-11 GCSEs:

2010-2015

St Richards Catholic College - Bexhill

- Awarded A in Maths
- Awarded A in English

Projects

Cyber Security Website | <https://github.com/josh484/multiple-choice-quiz>

A website that has multiple cyber security tools.

With a group we created a website that would take in an IP address and tell the end user if the IP was a threat, it also showed basic information of the IP such as general location and even a google map of its location.

My role in the team was to lead and oversee each part of the project, I had also been the one to create the JavaScript for the APIs on the IP tracker page.

List of Technologies:

HTML, CSS, JavaScript

Multiple Choice Quiz | <https://github.com/josh484/multiple-choice-quiz>

A multiple choice quiz using Browser DOM API

I created the website as a mini project for my bootcamp, I was given the HTML and had to create the JavaScript from scratch. I also used bootstrap and changed the CSS/HTML to make the UI look better.

List of technologies:

HTML, CSS, JavaScript, DOM Manipulation.

Soft Skills

Management – In group work, I have been able to get people organised and delegate work equally to each member.

Problem Solving – I am patient in my approach to a problem as well as ready to research exactly how to solve a problem.

Time management – I can choose how to prioritise workload based on the situation.

Troubleshooting - I am the go to of family and friends when they are in need of technology support i.e troubleshooting computer issues, gadgets etc. I can say that I enjoy helping and it has greatly improved my skill too.

Interests

Exercise - I got into physical exercise and bodybuilding because initially I wanted to get fitter but now it has become a way of life and a routine which helps to keep me disciplined and focused.

Badminton - I play badminton as a hobby. It improves my reaction speed and focus.
